

The micro-Chip Chromatography Company

We are looking for new colleagues to join our teams!

Laboratory Operator

The company

PharmaFluidics is a young, dynamic & fast paced tech company based in Ghent, Belgium. As a spin-off of the Vrije Universiteit Brussel and backed by experienced Venture Capital, PharmaFluidics has developed a series of game-changing chromatography products.

With unprecedented analytical resolution performance, PharmaFluidics' micro-chip based chromatography cartridges are now being commercialized for innovative biomarker, diagnostics and drug research & development applications in the global biotech and pharma industries.

The key expertise of PharmaFluidics are the design, lithographic production and surface treatment of silicon wafers for use as separation devices in liquid chromatography. PharmaFluidics collaborates with an extensive network of centers of excellence and pioneer users to develop a broad range of applications.

Position

In line with its steep growth ambitions PharmaFluidics seeks to extend its team and is looking for a qualified Laboratory Technician or Manufacturing Operator:

- with a strong motivation to use his/her technical skills for the manufacturing and assembly of a series of innovative microtechnology products;
- to participate in the organization of the manufacturing line, dedicated to timely deliver products.

You will have an important operational role, in a fast-paced stimulating work environment within a compelling business area, where many will depend on your performance to succeed.

Main responsibilities

- assemble and process production parts in a very precise way and according to well defined procedures;
- assisting in improving the process by following prescribed protocols defined by R&D;
- fix issues that might occur;
- maintain activity logs in a detailed way.

Profile

The successful candidate should have a strong affinity with microtechnology and a passion for innovation in life sciences. We are looking for a highly-motivated and talented individual with special attention for precision, accuracy and reliability, ...

Education, Competences and Skills

- bachelor in (Biomedical) Laboratory Technology, Micro- or Nanotechnology, or equivalent Technical education;
- highly motivated self-starter, able to work independently as well as a member of a team in a dynamic environment;
- well organized, punctual and focused on reliability and output.

Application

If you are interested and feel qualified for this position, please send your application, including your CV and a motivation letter to Ms. Ania Saeys, our Production and Supply Chain Manager, ania.saeys@pharmafluidics.com, Tel: +32 9 241 56 28.
